Agility™ 3

FEEL PROTECTED

From Every Angle

Agility™ 3

FEEL CLOSE

Even when Away

We help you provide full protection for your home and family with a single comprehensive security system. As you go about your day, our smartphone app enables you to control your security system from any location and receive notifications regarding any status updates. In the case of an alarm event, you or your security provider will receive video clips and still images of your home, giving you the option to assess a potential threat and take the necessary actions. You can also initiate live video with the touch of a button to check in on your home and family anytime.

See the **WHOLE PICTURE**

Whether near or far, you can now feel in touch with what is happening in your home.

By installing VUpoint IP cameras, available in both indoor and outdoor models, you can verify that your children arrived home safely from school or check on an elderly parent, simply by using our smartphone app, so that you can feel totally at ease.

If there is an alarm event, whether a suspected intrusion or a safety threat, you will receive a real-time notification with video clips or still images of your home, directly to your smartphone, so that you can decide if and how to react.

Agility™ 3 also enables the use of a wireless detector that includes an integrated camera for visual verification and direct communication capabilities via the RISCO cloud.

Agility™ 3

PROTECT your Home from Top to Bottom

Your family and home are fully protected with Agility™ 3. The system supports all state-of-the-art wireless detectors so that even the hard to reach areas of your home can be secured with minimal mess and installation time. A choice of modern, streamlined keypads are available in addition to a wide range of accessories to fit your every need. Protect your family and home 24/7.

Keep your **FAMILY SAFE**

Agility™ 3 offers a wide range of accessories for keeping your family and loved ones safe from danger.

Accessories for SAFETY

A wide range of safety detectors are available which detect dangerous levels of smoke, flood and dangerous gases.

Accessories for ELDERLY CARE

Rest assured that your elderly relative is safe. A panic keyfob or wristband can call for help in times of emergency.

Motion Detector with Integrated Camera

A wireless detector with a camera that is automatically activated when detecting an intrusion, sending images of the event directly to the iRISCO app on your smartphone.

Flood Detector

A wireless detector that provides early detection of water-based leaks, including in basements or near air conditioners and sinks.

Wireless Sounder

A siren for both indoor and outdoor use, with simple installation requirements.

Carbon Monoxide/Gas Detector

A wireless detector that monitors any buildup of carbon monoxide (CO) and other poisonous gases, alerting the control panel in the event of a hazardous threshold.

Outdoor Integrated Camera

A powerful outdoor detector that is solar powered and has video verification technology.

Wireless Magnetic Door Contact

Magnetic contacts for activating alarms in the event of an intrusion via doors or windows.

Wireless 4 Button Keyfob

A classic remote control with buttons for arming/disarming your system conveniently, without the need for a keypad.

Wireless Curtain Detector

A detector that is designed for the protection of windows and large glass doors.

Wireless Motion Detector

An indoor motion detector that can distinguish between the movement of intruders and pets.
